Installing rMove

1. Using the App Store (iPhone) or Google Play Store (Android) app on your phone, search for **rMove by RSG**.

2. Click "**Get**" (iPhone) or "**Install**" (Android) to install rMove on your phone.

A 3. **Open** the rMove app. If the app asks to:

- "allow notifications from the app," please click "**Allow**."

- "allow rMove to access your location even when you are not using the app", please click "**Allow**."

B 4. Enter the **authentication code** you were provided.

C 5. **Select your name** from the list of participating household members.

- Note: Please ensure all other participants in your household have rMove installed on their phones.

6. Read the rMove license agreement and press "**I Accept**" if you accept the terms and conditions. You may now begin using the app.

7. Please ensure you complete these steps **before** your first travel day.

How rMove Works

- rMove's goal is to capture the **Where, When, Who, Why & How** of your travel.

- rMove will **automatically capture** the **Where and When** for each trip using your smartphone. You can also add a trip that rMove missed.

- After you confirm or edit these initial details, rMove will ask you the **Who, Why, & How** of each trip.

- rMove will also let you **edit** a trip when needed:
  - You can split one trip into two trips by selecting **"add a stop along the way"**.
  - You can merge one trip with another trip by selecting **"remove this stop"**.
  - You can delete one trip by selecting **"delete trip"**.
  - If your trip has incorrect information, you can select **"other"** to report the error.
  - *Note: If rMove loses GPS signal, you may be asked to confirm or provide the start time, end time, and location details for a trip.*

- After each travel day, you will also receive a "**Daily Summary**" survey.

Android   iPhone

As a Reminder...

Make sure your **"Location Services" are ON** (and using the high accuracy setting for Android).

Make sure your **WiFi is ON** (WiFi does not need to be connected to a network, just ON).

Try to keep your phone **fully charged**. rMove may affect battery life.
